AUTHOR INDEX, Volume 54, Number 1	ii
M. L. GRETH and M. R. CHEVALLIER. Studies on ATP-Dependent Deoxyribonuclease of <i>Haemophilus influenzae</i> : Involvement of the Enzyme in the Trans-formation Process	1
ŠTEFAN KUŽELA, JORDAN KOLAROV, and VLADIMÍR KREMPASKÝ. Solu-bility of the Intramitochondrially Synthesized Protein and Other Membrane Proteins of Rat Liver Mitochondria in Acidic or Neutral Chloroform-Methanol	9
C. F. VAN KREIJL and P. BORST. Optimal Conditions for Primer-Dependent Trans-cription of POLY(dT) by RNA Polymerase	17
D. BOGDANOVSKY, W. HERMANN, and G. SCHAPIRA. Presence of a New RNA Species among the Initiation Protein Factors Active in Eukaryotes Translation	25
G. CHINALI and A. PARMEGGIANI. Properties of Elongation Factor G: Its Inter-action with the Ribosomal Peptidyl-Site	33
W. D. GRAZIADEI III, H. WEIDELI, and P. LENGYEL. Endonuclease of High Specific Activity in a Purified Mouse Interferon Preparation	40
F. R. SALEMME, S. T. FREER, R. A. ALDEN, and J. KRAUT. Atomic Coordinates for Ferriochrome c_2 of <i>Rhodospirillum rubrum</i>	47
MASAYOSHI OKUDE and SADAANKI IWANAGA. Microheterogeneity of Cross-Linked γ Dimers Isolated from Bovine Stabilized Fibrin	53
B. BARBIROLI, M. S. MORUZZI, M. G. MONTI, and B. TADOLINI. Diurnal Rhythmicity of Mammalian DNA-Dependent RNA Polymerase Activities I and II: Dependence on Food Intake	62
ANDREW W. MURRAY and AJIT K. VERMA. The Adenyl Cyclase System and Carcinogenesis: Decreased Responsiveness of Mouse Epidermis to Isoproterenol after 3,4-Benzpyrene Treatment	69
KARL GAEDE and PROVIDENCIA RODRÍGUEZ. Formation of Retinol [α , β - 32 P] Pyrophosphate with [γ - 32 P] ATP Catalysed by Whole Homogenates of Rat Thyroid	76
MATTHEW J. MURPHY, LEWIS M. SIEGEL, HENRY KAMIN, DANIEL V. DerVARTANIAN, JIN-PO LEE, JEAN LeGALL, and HARRY D. PECK, JR. An Iron Tetrahydroporphyrin Prosthetic Group Common to Both Assimilatory and Dissimilatory Sulfite Reductases	82
G. E. MORTIMORE, A. N. NEELY, J. R. COX, and R. A. GUINIVAN. Proteolysis in Homogenates of Perfused Rat Liver: Responses to Insulin, Glucagon, and Amino Acids	89
K. TOMITA, T. IZUNO, and T. FUJIWARA. Biologically Important Ternary Coordi-nation Complex. Crystal and Molecular Structures of Adenine-Glycylglycine-Copper(II) Complex.	96
DIETER ARNOLD, ERIKA HOMMEL, and HANS-JÖRG RISSE. Glycosyl Transfer Activities in Intact Liver Cells of Embryonic Chick	100
MARÍA DEL C. VILLARRUEL and JOSÉ A. CASTRO. Carbon Tetrachloride Target Lipids in Rat Liver Microsomes. Effect of Cystamine Administration on Their Pattern of Labeling by 14 CCl $_4$	108
JEFFREY A. KANT and THEODORE L. STECK. Adenosine 3',5' Monophosphate Binds Only to the Inner Surface of Human Erythrocyte Membranes	116
S. ZAVRIEV, G. GRIGORYAN, I. KRILOVA, and P. KARMANOV. A Spin-Label for RNA Study	123
R. A. ZUFAROVA, M. M. DEDYUKINA, L. V. MEMELOVA, and YU. M. TORCHINSKY. Identification of the Exposed and Buried Cysteine Residues in the Peptide Sequence of Aspartate Aminotransferase from Pig Heart Cytosol	127
R. MUKAI and Y. IIDA. Separation of RNA Polymerase Holoenzyme from Core Enzyme on DNA-Cellulose Column	134
LYNNE J. EDDY, JEROME M. HERSHMAN, R. E. TAYLOR, JR., and S. B. BARKER. Binding of Thyrotropin Releasing Hormone by Thyrotropin-Secreting Cells	140
CLAIRE BAXTER and CARMINE J. COSCIA. <i>In Vitro</i> Synthesis of Spermidine in the Higher Plant, <i>Vinca rosea</i>	147

CHARLES M. HELDEBRANT, CLAUDIA NOYES, HENRY S. KINGDON, and KENNETH G. MANN. The Activation of Prothrombin. III. The Partial Amino Acid Sequences at the Amino Terminal of Prothrombin and the Intermediates of Activation	155
ANN F. WELTON, THOMAS C. PEDERSON, JOHN A. BUEGE, and STEVEN D. AUST. The Molecular Weight of NADPH-Cytochrome <i>c</i> Reductase Isolated by Immuno-Precipitation from Detergent-Solubilized Rat Liver Microsomes	161
VICTOR RIZZA and A. S. L. HU. Gluconate Metabolism in <i>Pseudomonas</i> : A Novel Pathway of Glyceraldehyde-3-Phosphate Metabolism	168
TERRY WOOD. NADPH-D-Glyceraldehyde 3-Phosphate Oxidoreductase Activity in Muscle and Other Tissues of the Rat	176
MARTINE VAN LEEMPUT-COUTREZ, JEAN CAMUS, and JEAN CHRISTOPHE. Cyclic Nucleotide-Dependent Protein Kinases of the Rat Pancreas	182
A. BAR and R. H. WASSERMAN. Control of Calcium Absorption and Intestinal Calcium-Binding Protein Synthesis	191
S. RAMASWAMY and A. N. RADHAKRISHNAN. Lactase-Phlorizin Hydrolase Complex from Monkey Small Intestine: Stimulation of Phlorizin Hydrolase Activity by Organic Acids.	197
RICHARD H. HILDERMAN and MURRAY P. DEUTSCHER. Reactions at the 3' Terminus of Transfer Ribonucleic Acid. IX. tRNA Nucleotidyltransferase Activity in Bacteriophage T4-Infected <i>Escherichia coli</i>	205

Information for Contributors

BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS is devoted to the rapid dissemination of timely and significant observations in the diverse fields of modern experimental biology. Manuscripts submitted should be so written as to clearly emphasize the novel aspects of the information reported, with the understanding that the same material has not been, nor will be, submitted for publication elsewhere.

Manuscripts in duplicate may be sent to any one of the editors whose names and addresses are listed on the inside front cover.

To ensure rapid and accurate publication, it is essential that manuscripts conform to the instructions which follow. Manuscripts which are not in accordance with these specifications may be returned.

Preparation of Manuscripts

Article length should not exceed 5 typewritten pages, double-spaced on 8.5×11 in. high quality paper (the complete manuscript, including space occupied by figures and tables, should not exceed 8 pages).

Summary. Each article must be preceded by a brief summary, typed single-spaced, not exceeding 10 lines (approximately 100-150 words). This paragraph should adequately summarize the pertinent findings of the paper.

Typing. Articles are reproduced directly from the submitted manuscript as camera-ready copy. Manuscripts must therefore be typewritten on good quality white bond paper. A black silk or carbon typewriter ribbon should be used. Special care should be taken to ensure a sharp, clean impression of letters throughout. Use of an electric typewriter is strongly recommended. Erasures should be avoided. Care must also be taken to avoid errors in spelling, word division and punctuation.

Manuscripts should be double-spaced on one side of the sheet; **references, footnotes and figure legends should be single-spaced.** Typing area of the page must be as close as possible to 6.5 in. wide and 9.5 in. long.

Symbols and Abbreviations defined in the Commission on Biochemical Nomenclature Document No. 1 (*Arch. Biochem. Biophys.* (1966) **115**, 1-12) may be used without definition. Use of all other abbreviations and symbols is to be avoided. When abbreviations are essential, they should be created in accordance with the rules of the NAS-NRC Office of Biochemical Nomenclature and **must be defined in a footnote**, rather than in the text. Such abbreviations **must not** be used in the Summary. The improper use of abbreviations may necessitate the return of manuscripts for retyping, thereby delaying publication.

Enzyme names should not be abbreviated except when the substrate has an approved abbreviation (e.g., ATPase). Use of the Enzyme Commission ("EC") code number is recommended.

Isotopes should be styled following the recommendations of the IUB Commission of Editors of Biochemical Journals. The symbol for the isotope introduced should be placed in square brackets directly attached to the front of the name (e.g., [^{32}P]CMP). Note that the isotope number should only be used as a (superior) prefix to the atomic symbol, not to an abbreviation.

For further information regarding nomenclature authors are advised to consult the Instructions to Authors of the *Archives of Biochemistry and Biophysics* (1973) **154**, iii-xii. Reprints are available from the Publisher.

Footnotes should be typed single-spaced at the foot of the page on which they are mentioned in the text. References and figure legends should be typed single-spaced on separate pages.

Illustrations and Tables. **Do not attempt to insert figures, figure legends or tables into the text.** This will be done by the Publisher.

All drawings should be done with a mechanical lettering set (e.g., Leroy; lettering size 120 or 140) and black ink. Do not use press-on lettering; typewritten lettering is not acceptable.

Figures will be reduced to fit within the type area of the page (approximately 5×8 in.); the original drawings must be planned accordingly.

Glossy photographs of drawings are acceptable provided they are sharp, clear prints with an even *black* density.

Mathematical or chemical symbols that cannot be typed should be inked in carefully in black. Structural formulas should be drawn in black ink.

Illustrations and tables should be submitted on separate sheets.

Page Numbers and Headings. Page numbers should be typed at the top of the page.

The title of the paper should be typed in capital letters near the top of the first page, with the name(s) and affiliation(s) of the author(s) typed just below. Headings within the article should be arranged according to their relative importance.

References to the literature should be cited by the number in parentheses in the text and listed in numerical order in a single-spaced typed list placed at the end of the manuscript. Abbreviations of journals should conform to those of *Chemical Abstracts Service Source Index*, 1969. Note the following examples.

For a journal article:

1. Chatteraj, D. K., and Bull, H. B. (1971) Arch. Biochem. Biophys. 142, 363-370.

For a book by one or more authors:

2. Robison, G. A., Sutherland, E. W., and Butcher, E. (1971) Cyclic AMP, pp. 298-302, Academic Press, New York.

Note that inclusive pagination must be given.

Mailing. To avoid creasing, please place manuscripts between cardboards when mailing.

Acknowledgment of Receipt. Authors desiring acknowledgment of receipt of manuscript should enclose a stamped self-addressed card.

Reprints. Reprint order forms are sent to the authors immediately upon acceptance of their manuscript. The price list is included.
